(Claim 7) "...while the backup data is frozen, performing a server-free copy through the SAN of the backup data from the one or more other storage devices storing the backup data to the archive storage, wherein the server-free copy is initiated by a backup server, and wherein performing said server-free copy comprises copying the backup data to the archive storage through the SAN without the backup data passing through the backup server; and after completing the server-free copy, thawing the backup data so that the backup data may again be altered";

(Claim 13) "...while the backup data is frozen, performing the backup server initiating a server-free copy through the SAN of the backup data from the one or more other storage devices storing the backup data to the archive storage, wherein to perform said server-free copy, the backup data is copied to the archive storage through the SAN without the backup data passing through the backup server; and after
